

How to use Foody

Work hard, skip hangry.

No app to install · lives in **Slack**

GROUP FOOD ORDERING · 6 SIMPLE STEPS

From “let's eat something” to a shared basket — entirely in your channel.

1 Kick it off

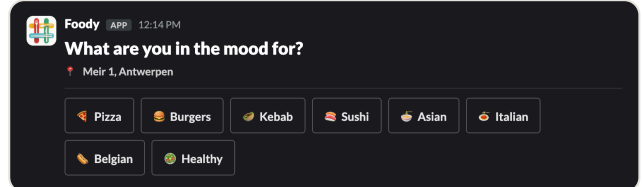

Type `let's eat something` in any channel. Foody greets you and remembers your delivery address.

Foody APP 12:14 PM
Foody here. Delivering to **Meir 1, Antwerpen** (say `change address to ...` to update).

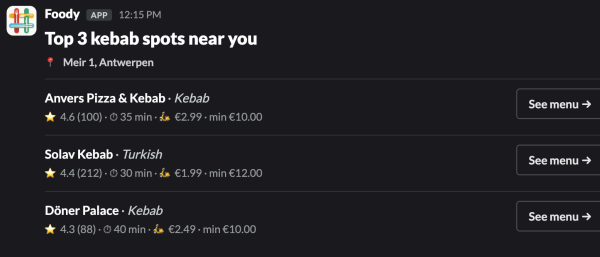

2 Pick a vibe

Tap a cuisine category — pizza, kebab, sushi, healthy... or skip straight to the top spots.

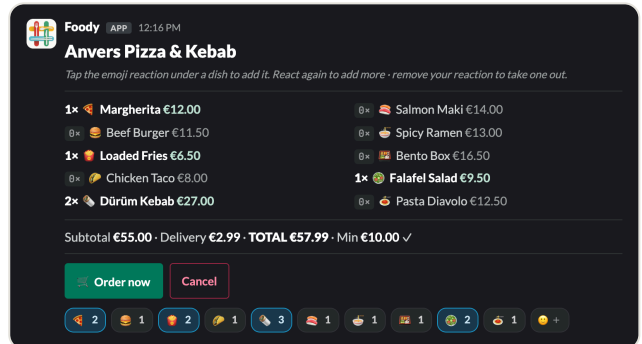

3 Choose a spot

The top 3 restaurants near you, scored and ranked. One tap to open the menu.

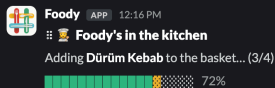

4 React to add

The top 10 dishes land pre-reacted. Tap an emoji to add it to the **shared basket** — the total updates live for everyone.

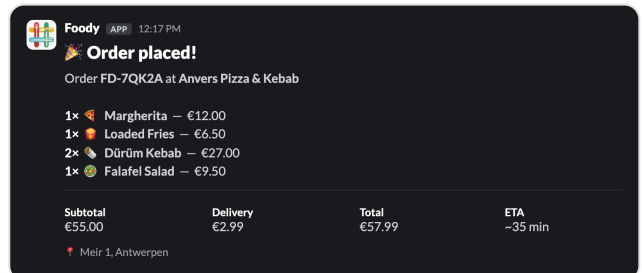

5 Order

Hit 🛒 **Order now**. Foody builds the basket on [takeaway.com](#) with a live progress card.

6 Done

A clean receipt lands in the thread — items, totals and ETA. Everyone's fed.

Two handy commands

`change address to ...` updates your delivery spot · `reset` starts the session over
